Response to Arguments

1. Applicant's arguments with respect to claims 1 and 3-28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-4, 7, 13, 15, 21-22 and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markkula, Jr. et al. (US 4,918,690).

2. Regarding claims 1, 3-4, 7, 13, 15, 21-22 and 28, Markkula discloses a method for forwarding packets to a network (Figure 4; abstract, lines 5-7; col. 6, lines 46-49). A packet forwarding system (Figure 1, items 27 or 28; col. 5, lines 54-55) creates a packet (Figure 6; col. 5, lines 15-18 and col. 13, lines 39-31) and attempts to forward the packet to the network (col. 14, lines 17-20). A time limit is established within which to forward the packet (col. 14, lines 13-15), and if the time limit is reached, then the packet is discarded (col. 14, lines 30-32). However, Markkula does not disclose the packet forwarding system having a memory to store packets. One skilled in the art would recognize that a packet memory is typically used for storing packets to be transmitted. Therefore, it would have been obvious to one skilled in the art at the time the invention was made to have a FIFO (first-in, first-out) memory for the packet forwarding system in the invention of Markkula in order to accommodate packets intended for transmission that cannot be immediately transmitted due to congestion, delay, jitter, etc. A FIFO

memory inherently causes the second-in-line packet to become the head-of-line packet for transmission when the previous head-of-line packet is removed (i.e. transmitted, discarded, etc.).

- 3. Regarding claim 3, the packet forwarding system successfully transmits packets (col. 13, lines 39-40).
- 4. Regarding claim 4, a packet transmission may be interrupted due to packet collisions (col. 69, lines 51-56).
- 5. Regarding claim 27, a packet is transmitted during a free period (col. 69, lines 35-41).

Allowable Subject Matter

6. Claims 5-6, 8-12, 14, 16-20 and 23-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 703-305-0139. The examiner can normally be reached weekdays, except Wednesday, from 8:00 AM to 6:30 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin, can be reached at 703-305-4366. The fax phone number for Technology Center (TC) 2600 is 703-872-9314.
